Setting the user interface language

Once you have logged into the system, use the globe icon in the top right corner of the screen to change the user interface language.

The following dialog will open and allow you to select one of the following languages.

UI languages

Current UI language  English (United States)

Select the language to switch to!

 中文 (中国)

 français (France)

 Deutsch (Deutschland)

 日本語 (日本)

 Cymraeg (Y Deyrnas Unedig)

Cancel

Area "My account"

Click on the avatar icon in the top right corner of the screen to open the following menu. Click *My account* to enter your personal preferences.

In the **General settings** tab you can check the following option:

Start a search (with empty search expression) automatically in the search page ☐

Every time you open the search page, the system will automatically start a search without a search term and the hit list will show the first entries in the database.

All other settings in this tab are not relevant for you.

In the **Terminology** tab you can set the number of search hits in the hit list by changing the number in the page length field. The default value is 50. Enter a lower value to view the most relevant hits at a glance.

— HIT LIST OPTIONS —

Page length	<input type="text" value="50"/>	<input type="button" value="▲"/> <input type="button" value="▼"/>
-------------	---------------------------------	--

In this tab you can also configure the search and display languages.

The **Background tasks** tab is not relevant for you as no settings can be made.

Adjusting the width of the hit list

You can use the arrow buttons at the bottom of the hit list to adjust the width of the hit list.
